SUMMARY

A **Full Stack Developer** with **6+ years of experience** in developing web applications using niche **JavaScript** technologies like **ReactJS, NodeJS, ExpressJS, Azure Functions.**

SKILLS

- ReactJS
- Javascript
- HTML
- CSS
- SCSS
- Redux Tool Kit
- NodeJS
- Express
- Azure Functions
- Azure Web Apps
- jQuery
- NextJs
- Typescript
- MongoDB
- Dataverse
- FetchXml
- Tailwind

TOOLS

- VSCode
- Git
- Postman
- Github Copilot
- JIRA
- ChatGPT

WORK EXPERIENCE

Senior Associate
PricewaterhouseCoopers (PwC)   **12/2023 - Present**

- Developed multiple **Function apps** using MSFT **Azure functions** to build **Rest API's,** Focusing on complex **automated report generation** functions in Azure with **NodeJS/Express** resulting in **90% effort savings for the client** who generated the same report manually.
- Developed **data migration scripts** using NodeJS/Express to migrate data to new MSFT Data-verse environments which helped in **saving storage fees** to maintain data in oracle DB.
- Developed multiple React apps involving **complex data extraction and structuring** functions using **AI builder and react-pdf** to extract PDF data and structure it which helped **analyze payments and structure deals at 40% higher rate**.
- **Collaborated with Tech leads and Business Analysts** in **architectural discussions** to provide **technical analysis, solution design,** estimations and proof-of-concepts for various epics and stories.

Associate 2
PricewaterhouseCoopers (PwC)   **06/2022 - 11/2023**

- Migrated a legacy Investment management application to React app hosted on power portals, with various **platform integrations** like **Azure Storage, Power Automate, AI Builder** and optimization techniques like search with **debouncing, throttling, higher-order filtering**.
- Developed multiple **interactive grid** views using **AG grid** which helped clients to track their investments and generate reports instantly.
- Developed a **Ride sharing app for employees as an initiative** using **ReactJS, Redux** which helped employees share rides and **tackle problems like traffic, parking space, fuel expense and pollution**.

CERTIFICATIONS

All Certifications and awards are available in **my website with link** given below -

https://certificate-gallery-mocha.vercel.app

Awards -

- **Above and Beyond Award (PwC)** - For demonstrating **exceptional client service**, living the PwC values and **inspiring others**.
- **People's Choice Award (PwC)** - For consistently exhibiting **excellent interpersonal skills, willingness to share** knowledge and expertise, and **commitment to the team's success**.

EDUCATION

Bachelor of Engineering in Electronics & Communication
CGPA : 8.21/10
SDM College of Engineering and Technology Dharwad
08/2014 - 05/2018

System Engineer

Tata Consultancy Services (TCS)   **09/2020 - 05/2022**

- Developed React applications using **hooks, redux, react-router, context API** with optimization techniques such as **code splitting, lazy loading, memoization, Shimmer UI and store caching** to build UI's for AI based applications for telecom client which helped automate process tracking for maintenance services.
- Developed SPA's in React to visualize various telecom KPIs using **E-Charts, Map-box** with multiple detail views, **SVG's and notifications** and Interactive forms with **CRUD** operations.
- Developed UI for survey based application which scheduled survey's and analyzed customer ratings. It included **Interactive dashboards** with **filters, pagination, charts like pie chart, bar charts, doughnut** etc.

Assistant System Engineer

Tata Consultancy Services (TCS)   **09/2018 - 08/2020**

- Developed Reusable UI components like **Map views, moveable cards, Timers**, Modals, **complex graphical representations** using **force-directed-graphs** (Amcharts).
- Developed **Environment and Role based authentication** on web-applications.
- Developed **Responsive layouts** using **SCSS, Flexbox and CSS grid.**
- Adapted **Agile methodology** for briefing team in scrum calls, creating user story, tasks and estimating efforts using **JIRA**.
